

# Have you pre-ordered your Emergency Permits yet?

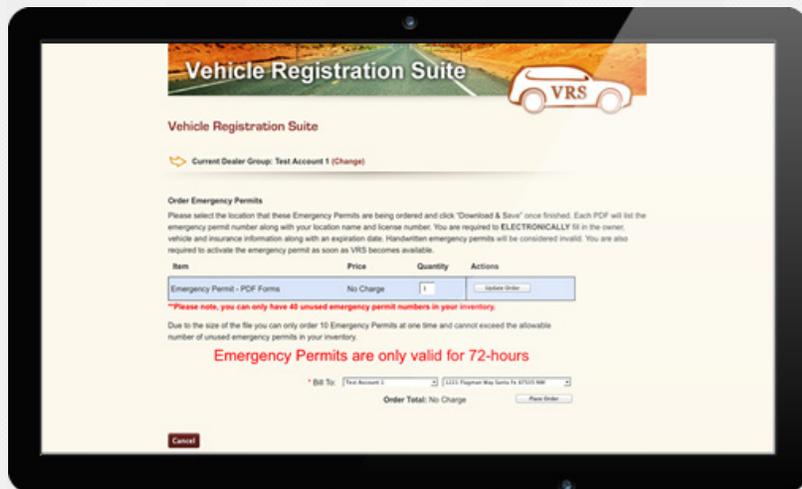

In case the VRS system is suddenly unavailable, be prepared to get your customers out the door quickly and legally. It's fast, easy and free to order!

## 1. Order

Log into VRS and click on "Order Emergency Permit Supplies." You can order up to ten emergency permits at a time and have up to forty unused permits in your inventory at one time.

## 2. Download and Save

Once your order is placed, download and save the PDF to your computer.

## 3. Use

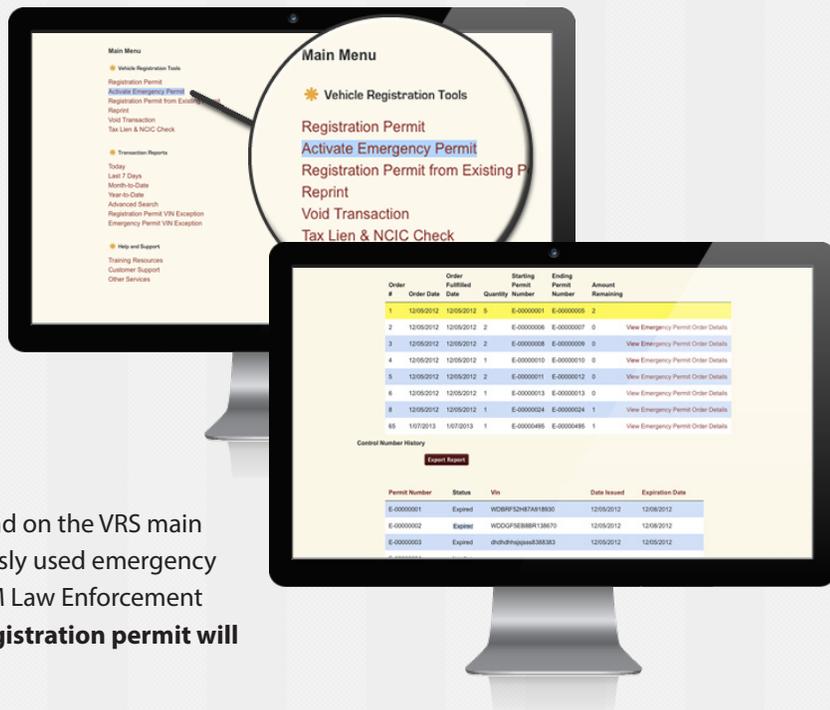

Emergency permits are only to be used when the VRS system is not available. **NOTE: You will not be able to utilize these permit numbers if your Internet service is down.**

## 4. Activate

As soon as the VRS system becomes available, you will be required to activate the emergency permit that was used. You will be able to generate and print a regular temporary registration permit at the time of activation. The link to activate the emergency permit can be found on the VRS main menu under "Vehicle Registration Tools."

## 5. Track

The list of all used and unused emergency permits can be found on the VRS main menu under "Emergency Permit Inventory Report." All previously used emergency temporary permits will display as "Expired" in the VRS and NM Law Enforcement system. **Vehicles with an expired emergency temporary registration permit will be subject to law enforcement action.**

**Be Prepared: Order Your Emergency Permits Today!**
